+39 350 561 3338 — luca.tom1995@gmail.com — lucatomei.github.io — linkedin.com/in/TomeiLuca — github.com/LucaTomei

Professional Profile — Computer Engineer with experience in software development, implementation, and maintenance of ERP systems. Specialized in technical analysis, bug resolution, and system integration. Strong skills in Python, Java programming, and web development. Continuously updating professional expertise with numerous certifications in IT, artificial intelligence, and agile methodologies. Seeking a dynamic organization where I can solve complex IT challenges and contribute to the welfare of society.

Technical Skills

Languages C#, Python, Java, C/C++ , SQL, JavaScript, PHP, Swift, Kotlin	DevOps Git, Docker, Linux, CI/CD
Frameworks Angular, React, React Native, Node.js	Cloud AWS, Azure, IBM Cloud
Databases SQL Server, PostgreSQL, MongoDB	ERP ERP Business Engine, System Integration
	Design Autodesk Fusion 360, AutoCAD
	Low-Code OutSystems, Databricks

Professional Experience

Yokohama TWS

IT Development Advisor

May 2023 – Present

Tivoli (Rome), Italy

- Responsible for driving technical analysis, development, and implementation of custom IT solutions, including ERP systems and Low-code Applications
- Design, develop, and maintain scalable and high-performance applications using agile methodologies
- Coordinate successful implementation of new IT solutions in line with agreed expectations
- Manage outsourced development projects, coordinating with external consultants
- Define software development strategies and best practices aligned with business objectives
- Collaborate with cross-functional teams to translate business requirements into technical specifications
- Provide technical leadership to development team, ensuring code quality and performance
- Perform code reviews and ensure technical documentation is up to date
- Troubleshoot and resolve issues and bugs in applications in a timely manner

Trelleborg Wheels System

ERP Developer

November 2021 – May 2023

Tivoli (Rome), Italy

- Analyzed functional documentation and created technical documentation
- Identified and fixed bugs in ERP systems
- Managed ERP technical systems: Business Engine, interfaces, layouts, reports
- Integrated ERP system with other business systems
- Maintained ERP versions updated according to vendor releases
- Supported business for ERP technical issues
- Collaborated with ERP technical consultants for complex implementations

Freelance

Technical Installer and Maintenance Specialist

November 2015 – Present

Rome, Italy

- Installed home automation systems for private homes and commercial spaces
- Installed and maintained electronic components and control systems
- Maintained air conditioning, heating, and electrical systems
- Developed databases for business data administration and management
- Provided technical support and consulting for system optimization

Education

Sapienza University of Rome <i>Master's Degree in Engineering in Computer Science</i> – Thesis: "Design and proof-of-concept of the integration of an electric scooter with a wheelchair: from the mechanical design to the firmware upgrade" – Developed Python client application and custom firmware for electric scooters – Created acceleration algorithm for electric vehicles – Designed 3D bracket to connect electric scooter and wheelchair – Implemented graphical interface for firmware creation automation	January 2020 – October 2021 110/110
Sapienza University of Rome <i>Bachelor's Degree in Computer and Automation Engineering</i> – Thesis: "Mapping Management of an Ontology-based Data Access System" – Developed Java and React server application – Designed and implemented user-friendly graphical interface – Developed Java code for control logic and ontology management – Implemented query system directly from browser	2016 – 2019 99/110
Ettore Majorana Scientific High School <i>Scientific High School Diploma</i>	2009 – 2014 Guidonia, Italy

Certifications

Key Certifications – Outsystems Associate Reactive Developer - OutSystems (2024) – Academy Accreditation - Databricks Lakehouse Fundamentals - Databricks (2022) – Introducing Semantic Kernel: Building AI-Based Apps - LinkedIn (2024) – Software Architecture Fundamentals - Birdify - LMSAFP (2024) – Artificial Intelligence Fundamentals: Machine Learning - Birdify (2024) – Java/Python/React (Basic) - HackerRank (2021) – Rest API (Intermediate) - HackerRank (2021) – SQL (Basic & Intermediate) - HackerRank (2021) – Introduction to iOS Mobile Application Development - Meta, Coursera (2023) – Introduction to Cloud Computing - IBM, Coursera (2022) – Introduction to Cybersecurity Tools - IBM, Coursera (2022) – Foundations of User Experience (UX) Design - Google, Coursera (2022) – Introduction to Data Analytics - IBM, Coursera (2022) – Crash Course on Python - Google, Coursera

Projects

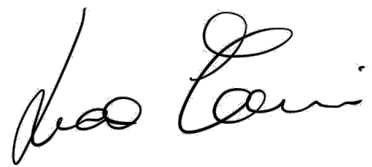

LazioHealthMonitorBot – Created a Telegram bot for monitoring National Health System appointment availability in Lazio region – Developed real-time notification system for new hospital appointment slots – Implemented continuous monitoring (every 5 minutes) of availabilities – Designed intuitive user interface with custom Telegram keyboard – Built multi-user system to support families or groups – Tech stack: Python, Telegram Bot API, REST API, JSON – Open source project available on GitHub (github.com/LucaTomei/LazioHealthMonitorBot)	2024 – Present
Electric Scooter Wheelchair – Designed and developed a system to integrate electric scooter with wheelchair – Created custom firmware to improve performance and safety – Developed algorithms to optimize acceleration and braking – 3D modeled connection components between the two vehicles – Implemented software interface for system control	2020 – 2021
Open Source Projects – Monolith: Ontology-based data access system – ColliGO: Solution to reduce queues and increase safety – MAXG30CFW: Firmware creator for Ninebot electric scooter – RemindMe: Tools Installer for Ubuntu environment – GL.iNet-VpnSwitcher-OpenWrt: Automated VPN switch system – Hoodie-MusicDownloader: Music download tool – Esp32-Cam-PIR-Telegram: Surveillance system with Telegram notifications	2016 – Present
