Professional Profile — Computer Engineer with hands-on expertise in full-stack development (.NET 8, Angular, SQL Server), enterprise ERP integration (Infor M3 on-premise and cloud), and microservices architecture. Specialized in designing enterprise integration flows (MEC, ESB, 3PL) with REST APIs and XSD/XML, and in low-code development with OutSystems. Proficient in containerized environments (Docker), Azure DevOps CI/CD pipelines, and database management. Detail-oriented with a production-grade mindset and strong ownership over end-to-end delivery — from analysis to deployment and support. Continuously expanding expertise with certifications in IT, artificial intelligence, and agile methodologies.

Technical Skills

Languages	C#, Python, Java, C/C++, SQL, JavaScript, PowerShell, VBA, PHP	Linux	
Frameworks	Angular, .NET 8, React, React Native, Node.js	Cloud	Azure, AWS, IBM Cloud
Databases	SQL Server, PostgreSQL, MongoDB	ERP	Infor M3 (On-Prem & Cloud), MEC, ESB
DevOps	Azure DevOps, Git, Docker, CI/CD, IIS,	Integration	REST APIs, Microservices, XSD/XML, 3PL
		Low-Code	OutSystems, Databricks
		IoT & Embedded	Node-RED, Home Assistant, MQTT, NFC
		Design	Autodesk Fusion 360, AutoCAD

Professional Experience

Yokohama TWS

IT Development Advisor

May 2023 – Present

Feb 2026 – Present | Tivoli (Rome), Italy

- Define software development strategies and best practices, governing adoption of microservices architecture, Azure DevOps CI/CD pipelines, and Docker-based deployments
- Provide technical leadership ensuring code quality and performance across .NET 8, Angular, and SQL Server stacks
- Design and govern enterprise API orchestration between microservices and legacy systems via MEC and ESB middleware
- Coordinate Infor M3 cloud migration and rollout of OutSystems low-code applications aligned with business requirements
- Manage outsourced development projects, aligning external consultants and 3PL integration partners with company standards
- Collaborate with cross-functional teams to translate business requirements into scalable, documented technical specifications

IT Development Specialist

May 2023 – Feb 2026

- Led technical analysis, development, and implementation of custom IT solutions on Infor M3 ERP (on-premise) and OutSystems low-code platform
- Developed REST APIs and C#/.NET backend microservices integrated with Angular enterprise dashboards and SQL Server databases
- Designed and maintained enterprise integration flows (MEC, ESB, 3PL) with XSD/XML schema design and data mapping based on functional traceability documents
- Built and maintained Azure DevOps CI/CD pipelines for automated deployment of frontend, backend, and database components
- Troubleshoot inbound/outbound integration documents across MEC/ESB middleware layers with external logistics partners
- Performed code reviews, root cause analysis, and maintained technical documentation and runbooks

Trelleborg Wheels System

ERP Developer

November 2021 – May 2023

Tivoli (Rome), Italy

- Analyzed functional documentation and created technical documentation
- Identified and fixed bugs in ERP systems
- Managed ERP technical systems: Business Engine, interfaces, layouts, reports
- Integrated ERP system with other business systems
- Maintained ERP versions updated according to vendor releases
- Supported business for ERP technical issues
- Collaborated with ERP technical consultants for complex implementations

Freelance*Technical Installer and Maintenance Specialist***November 2015 – Present***Rome, Italy*

- Installed home automation systems for private homes and commercial spaces
- Installed and maintained electronic components and control systems
- Maintained air conditioning, heating, and electrical systems
- Developed databases for business data administration and management
- Provided technical support and consulting for system optimization

Education

Sapienza University of Rome

January 2020 – October 2021

Master's Degree in Engineering in Computer Science

110/110

- **Thesis:** "Design and proof-of-concept of the integration of an electric scooter with a wheelchair: from the mechanical design to the firmware upgrade"
- Developed Python client application and custom firmware for electric scooters
- Created acceleration algorithm for electric vehicles
- Designed 3D bracket to connect electric scooter and wheelchair
- Implemented graphical interface for firmware creation automation

Sapienza University of Rome

2016 – 2019

Bachelor's Degree in Computer and Automation Engineering

99/110

- **Thesis:** "Mapping Management of an Ontology-based Data Access System"
- Developed Java and React server application
- Designed and implemented user-friendly graphical interface
- Developed Java code for control logic and ontology management
- Implemented query system directly from browser

Ettore Majorana Scientific High School

2009 – 2014

Scientific High School Diploma

Guidonia, Italy

Certifications

Key Certifications

- **Outsystems Associate Reactive Developer** - OutSystems (2024)
- **Academy Accreditation - Databricks Lakehouse Fundamentals** - Databricks (2022)
- **Introducing Semantic Kernel: Building AI-Based Apps** - LinkedIn (2024)
- **Software Architecture Fundamentals** - Birdify - LMSAFP (2024)
- **Artificial Intelligence Fundamentals: Machine Learning** - Birdify (2024)
- **Java/Python/React (Basic)** - HackerRank (2021)
- **Rest API (Intermediate)** - HackerRank (2021)
- **SQL (Basic & Intermediate)** - HackerRank (2021)
- **Introduction to iOS Mobile Application Development** - Meta, Coursera (2023)
- **Introduction to Cloud Computing** - IBM, Coursera (2022)
- **Introduction to Cybersecurity Tools** - IBM, Coursera (2022)
- **Foundations of User Experience (UX) Design** - Google, Coursera (2022)
- **Introduction to Data Analytics** - IBM, Coursera (2022)
- **Crash Course on Python** - Google, Coursera

Projects

LazioHealthMonitorBot

2024 – Present

- Created a Telegram bot for monitoring National Health System appointment availability in Lazio region
- Developed real-time notification system for new hospital appointment slots
- Implemented continuous monitoring (every 5 minutes) of availabilities
- Designed intuitive user interface with custom Telegram keyboard
- Built multi-user system to support families or groups
- Tech stack: Python, Telegram Bot API, REST API, JSON
- Open source project available on GitHub (github.com/LucaTomei/LazioHealthMonitorBot)

Electric Scooter Wheelchair

2020 – 2021

- Designed and developed a system to integrate electric scooter with wheelchair
- Created custom firmware to improve performance and safety
- Developed algorithms to optimize acceleration and braking
- 3D modeled connection components between the two vehicles
- Implemented software interface for system control

Open Source Projects

2016 – Present

- **Monolith:** Ontology-based data access system
- **ColliGO:** Solution to reduce queues and increase safety
- **MAXG30CFW:** Firmware creator for Ninebot electric scooter
- **RemindMe:** Tools Installer for Ubuntu environment
- **GL.iNet-VpnSwitcher-OpenWrt:** Automated VPN switch system
- **Hoodie-MusicDownloader:** Music download tool
- **Esp32-Cam-PIR-Telegram:** Surveillance system with Telegram notifications
